Sonali Chowdhry is a Marie Skłodowska-Curie PhD Fellow currently based at the Kiel Institute for the World Economy in Germany. Her research examines firm participation in global value chains and the heterogeneous effects of trade policy changes across and within firms. To study these issues, she analyses confidential customs data using modern econometric and big data methods. Chowdhry is also an active contributor to contemporary policy discussions on trade issues.

Her most recent policy work spans the US-China trade conflict, Brexit, the economic cost of sanctions, the US-Japan Phase I trade deal and gains from the deep and comprehensive EU-Japan Economic Partnership Agreement. Her research has been reported on by The New York Times, Reuters, Bloomberg, Der Spiegel, Die Zeit and Deutsche Welle. Prior to joining the Kiel Institute, Chowdhry worked as a Junior Economist with the Ifo Institute's Center for International Economics. She read for the MPhil in Economics from University of Oxford and is a recipient of the prestigious Rhodes Scholarship from India.
