

Anthony (Tony) Boardman is Professor Emeritus in the Sauder School of Business, University of British Columbia. Tony's research interests are in the areas of cost-benefit analysis, privatization, and public-private partnerships. He has published extensively in many leading academic and practitioner journals, and is a co-author of *Medical Isotope Production Without Highly Enriched Uranium and Cost-Benefit Analysis: Concepts and Practice*. He also co-edited the *International Handbook on Public-Private Partnerships*. He has won a number of awards including the Alan Blizzard Award and the John Vanderkamp prize (Canadian Economics Association) and the J.E. Hodgetts Award (Institute of Public Administration of Canada). He serves on the editorial board of the *Journal of Global Operations and Strategic Outsourcing*. Tony has been a consultant to many leading public sector and private sector organisations, and has served on the Board of the Institute for Health System Transformation and Sustainability and the Patented Medicine Prices Review Board.
