Financial assistance was provided by the Dr. Donald Clogg Memorial Lecture in Pediatric Emergency Medicine Fund through the Alberta Children's Hospital Foundation

Management of the Febrile Young Infant in 2022: Can We Safely Do Less?

Paul L. Aronson, MD, MHS

Associate Professor of Pediatrics and of Emergency Medicine
Deputy Director, Pediatric Residency Program
Yale School of Medicine

Objectives:

1. Evaluate the recommendations from the American Academy of Pediatrics febrile infant clinical practice guideline.
2. Compare the performance characteristics of the newer risk stratification algorithms that include procalcitonin.
3. Analyze the evidence for selective lumbar punctures in febrile young infants with positive urinalyses.
4. Describe tools in the Epic electronic health record system that can be used to improve the care of febrile young infants.
